(RWO) Rough Wall Opening

If a wall opening has been framed or finished for the former vendor, an adapter kit, Bobrick Part No. 3706-176, is available as an accessory to cover the existing larger opening.

Attached for your information is a Technical Data sheet on Bobrick's new push-button operated sanitary napkin-tampon vendor. Use the product specification on the TD Sheet to update your CSI Master Format Division 10 Specialties, Section 102800 Washroom Accessories Master Specification for sanitary-napkin tampon vendors.

We are confident that Bobrick's new push-button vendors offer a greater value than our former vendors and other vendors currently available in the market.
